This workshop is an opportunity to study with a group of members from the Plein Air Painters of America. The three day class begins with an all-day lecture, followed by two days of painting and teaching in the field. Have no worries about not getting to paint with a particular instructor. The format for the workshop is one where you get the benefit of six PAPA artist instructors. The instructors will demo on both field days and also help the students as they work on their own paintings. Teachers will determine painting locations on the grounds of Flathead Lake Lodge. Because Flathead Lake Lodge is a dude ranch located on the shore of Flathead Lake painting options include the waterfront, stables, forested areas, and the main grounds. Each instructor will aid students with their own take on what they should consider, as well as help them with questions that may arise. Given the number of instructors this will be a great opportunity to receive varying feedback from some of the countries' finest outdoor painters.
